DETAILED ACTION

Applicant's cancellation of claims 7,11 filed 11/6/07 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6,15-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Hasegawa et al. (US 2003/0060138 A1).

With respect to claim 1-6,15-21, Hasegawa et al. disclose on page 2, lines 1-3 & page 4, lines 5-15, a polishing pad comprising a polishing layer having water-soluble particles having an average particles diameter of 0.1 to 1000 microns dispersed in a matrix material, appear to be identical to the claimed. The product-by-process limitation, "wherein said pad is produced by a method comprising: dispersing the water-soluble particles in a crosslinking agent to produce a dispersion, mixing the dispersion with a

polyisocyanate and/or an isocyanate terminated urethane prepolymer to produce a mixed solution, and reacting the mixed solution to produce a polishing pad comprising a polishing layer having the water-soluble particles dispersed in a polymer matrix” would not be expected to impart distinctive structural characteristics to the polishing layer having water-soluble particles having an average particles diameter of 0.1 to 1000 microns dispersed in a matrix material.

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Allowable Subject Matter

Claims 8-10,12,13,14 are allowed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
